

Loan Origination System

Persistent's Loan Origination System is an application which automates the loan system.

- The application does auto underwriting of loans and gets the approval from the respective authority.
- The application does document verification, agreement generation, property appraisal, risk qualification, KYC completion, background certification, and fund disbursement.
- Higher authorities will have an analytical view of loan information in the form of charts in the report.
- Docu-sign email integration helps to track the borrower's hand-written signature for documents.

Loan Origination System

This application is developed to automate the loan process from loan request to fund disbursement to borrower.

Docu-Sign Email Integration

The handwritten signature of a borrower can be attached to a document using docu-sign integration.

Report Dashboard

The report dashboard shows loan information in a pie chart and column chart by status and time period respectively.

Well-Structured Loan Request

A new loan origination request is raised in four phases: Application Details, Borrower Details, Upload Documents and Summary View.

Transparency and Accountability

The application has capability to upload multiple documents at a time.

Loan Agreement Generation

The system is able to generate a loan agreement automatically based on the given information.

Loan Request Tracking

A loan request can be tracked in the news feed with real time progress.

About Persistent

We are a trusted Digital Engineering and Enterprise Modernization partner, combining deep technical expertise and industry experience to help our clients anticipate what's next. Our offerings and proven solutions create a unique competitive advantage for our clients by giving them the power to see beyond and rise above.
